## Experience

### 2022 - 2025

Lead iOS Engineer, [VistaCreate](#) and [VistaPrint](#)

#### *Role and responsibilities:*

- Make completely new app Home screen
- Write **unit tests** for cover app business logic
- Build an app with a **modular architecture**
- Work with analytics services **Firebase**, **AppsFlyer**, **Iterable**
- Implement **A/B tests**

### 2020 - 2022

Software Engineer (iOS, Swift) at [Clowder](#)

#### *Role and responsibilities:*

- Create copies (apps) of the **Core** product
- Add customizations to the clones and enable/disable product modules
- Integrate user profile with custom fields to the clones of the **Core** product
- Work with Git by **GitFlow** methodology, resolve merge conflicts
- Support existing apps and update to the latest version of the **Core** product
- Create proposals and make changes in the **Core** product

### 2020 - 2021

Software Engineer (iOS, Swift) at [CoachNow](#)

Main responsibility was to support the [CoachNow app](#) (iOS and iPadOS) and add new features. It's an app with a long history (8+ years) and mixed codebase (Objective-C and Swift) with a lot of dependencies.

#### *Role and responsibilities:*

- Rewrite code from Objective-C to Swift
- Make code reviews
- Publish new versions of the app to the **TestFlight** for internal testing
- Publish new releases of the app to the **App Store**
- Implement screen recording with ReplayKit framework
- Implement "pinned posts" feature
- Make improvement and fixes

## 2016 - 2020

iOS, iPadOS and macOS Apps Developer at [App Dev Academy](#)

I have participated in development, publication and support of **10+ iOS apps** and one macOS app.

### *Role and responsibilities:*

- Create apps from scratch and design apps architecture
- Create user interface with **Storyboards** and **XIB** files
- Use UIKit and create **custom UI** components
- Design a database architecture and use **Core Data** framework
- Write code on Swift programming language
- Implement networking layer - **REST API**
- Integrate third-party dependencies

## 2012 - 2016

PHP Developer at [bvblogic](#)

I build websites on PHP programming language, using frameworks such as Laravel, Kohana, Codeigniter, Yii. Also, I used CSS3, HTML5, jQuery, and Bootstrap for the frontend. First experience of building and supporting commercial projects.

## 2012 - 2013

Senior Laboratory at [Laboratory of distance learning](#) at [Sumy State University](#)

I worked on simple training apps for students on Java and an internal framework. Also convert Microsoft Word documents to HTML pages as part of my job there.

## 2007 - 2008

Laboratory Technician at [Polytechnic College of Konotop Institute of the SSU](#)

At college, my job was to configure, maintain and update PCs on Windows 98 and XP. Also, I helped students to make homework done.

---

## Skills and Technologies

**AI & Machine Learning:** Claude Code, Codex, ChatGPT, CoreML, Foundation Models, ML Kit, Cloud-based AI Services.

**Programming Languages:** Swift, Objective-C, JavaScript, Ruby, PHP, Python, Shell script.

**Mobile Development:** UIKit, SwiftUI, Auto Layout, Core Data, Swift Data, CocoaPods, SPM, Firebase, In-App Purchase, RevenueCat, TestFlight, App Store Connect.

**Tools & Others:** Git, GitFlow, CI/CD.
