Experience

2025 - 2026

iOS Developer, [HooH](#)

- Designed and built the app's architecture from scratch
- Implemented real-time AI chat
- Set up subscriptions and paywalls with RevenueCat
- Integrated analytics: PostHog (feature flags, session replay), AppsFlyer, TikTok Business SDK
- Set up Xcode Cloud CI/CD with Development, Staging, and Production targets
- Took the app from first commit to App Store launch, and continued to ship new releases

2022 - 2025

Lead iOS Engineer, [VistaCreate](#) and [VistaPrint](#)

- Implemented a new Home screen per the Figma design, improving the first experience with the app for new users and enabling promotion of seasonal offers and discounts
- Implemented modular architecture with CocoaPods modules for feature isolation
- Continuously iterated on the onboarding flow, testing different variants with A/B tests to improve user conversion
- Integrated analytics: Firebase, AppsFlyer, Iterable, Segment
- Increased unit test coverage with XCTest across core business logic modules
- Collaborated with product, design, and analytics teams on feature planning

2020 - 2022

Software Engineer (iOS, Swift) at [Clowder](#)

- Customized and deployed iOS apps for 50+ organizations from a shared Core product
- Maintained GitFlow across a large multi-repo setup, resolving merge conflicts
- Proposed and implemented changes to the Core product
- Managed CI/CD pipeline with GitLab CI, Fastlane, and AppCenter distribution

2020 - 2021

Software Engineer (iOS, Swift) at [CoachNow](#)

- Supported and extended a legacy Objective-C + Swift hybrid codebase
- Rewrote legacy Objective-C code to Swift incrementally

- Implemented screen recording with ReplayKit framework
- Conducted code reviews and managed TestFlight / App Store releases

2016 - 2020

iOS, iPadOS and macOS Apps Developer at [App Dev Academy](#)

Participated in development, publication and support of 10+ iOS apps and one macOS app.

- Create apps from scratch and design apps architecture
- Create user interface with Storyboards and XIB files
- Use UIKit and create custom UI components
- Design a database architecture and use Core Data framework
- Write code on Swift programming language
- Implement networking layer - REST API
- Integrate third-party dependencies

Earlier Experience (2007 - 2016)

PHP Developer, Academic & Technical Roles

Built and maintained commercial web applications and internal tools; early experience in system maintenance, programming fundamentals, and software engineering practices.

Skills and Technologies

Core iOS

Swift, UIKit, SwiftUI, Auto Layout, Core Data, SwiftData

Architecture & Tooling

Modular architecture, CI/CD, GitFlow, Unit Testing, SPM, CocoaPods

Monetization & Analytics

In-App Purchases, RevenueCat, Firebase, AppsFlyer, Iterable, A/B Testing

AI/ML

CoreML, Foundation Models, ML Kit, Cloud AI APIs, AI-assisted development tools

Programming Languages

Swift, Objective-C, JavaScript, Ruby, PHP, Python, Shell script

Education

Bachelor of Computer Science

Sumy State University · 2009–2012

Specialization: Software Engineering

Junior Specialist

Polytechnic College of Konotop Institute of Sumy State University · 2007–2008

Field: Computer Maintenance, Intelligent Systems, and Networks
